Pune,India. Linkedin: Portfolio: GitHub:

Information Technology undergraduate with hands-on experience building full-stack web applications using JavaScript, React, Node.js, and Firebase. Interested in UI Automation, REST API testing, and building reliable web systems. Strong foundation in backend APIs, real-time dashboards, and modern web development workflows using GitHub and collaborative development practices.

EDUCATION

Institution	Degree / Course	Duration	Score / CGPA
Vishwakarma Institute of Technology, Pune	B.Tech in Information Technology	2024- 2028	CGPA: 8.38
Aakash Junior College	Higher & Secondary Education (Science)	2022–2024	Percentage: 70.40%
Smt. Pd. Navjeevan Day School	Secondary & Higher Secondary	2010–2020	Percentage: 84.40%

PROJECTS

- **EcoPulse AI — Smart Environmental Monitoring Platform**
- Tech: React, Node.js, Express, MongoDB, AI APIs
- • Developed an AI-powered platform to monitor environmental metrics and generate sustainability insights.
  • Built responsive frontend using React and backend APIs using Node.js and Express.
  • Implemented AI-based analysis to visualize trends and provide recommendations through dashboards.
  • Designed scalable MongoDB database architecture for efficient data storage.

Cricket Hub — Real-time Cricket Score & Insights Platform

- Tech: React, Firebase, REST APIs
- • Built a responsive dashboard displaying live scores, player statistics, and match updates using Cricket API.
- • Implemented Firebase authentication and database for user preferences and favorites.
  • Designed the frontend architecture to support future UI automation and REST API testing workflows.
- **Peer-to-Peer Learning Platform :- React, Node.js, Socket.io, MongoDB, WebRTC**
- Developed an interactive platform for student collaboration with chat and video conferencing.
- Designed a matching system pairing learners with complementary skills for effective peer learning.
- Built frontend with React.js and Tailwind CSS for responsive UI; backend with Node.js for lightweight APIs; used Supabase with PostgreSQL for scalable data storage; integrated Google Calendar API and OAuth for scheduling and secure login. The system covers user sign-up, auto-match suggestions, session booking synced to calendar, and feedback/rewards collection.

TECHNICAL SKILLS

- Languages: Python, C, JavaScript, SQL
- Databases: MongoDB, MySQL / PostgreSQL
- Frameworks & Libraries: React, Node.js, Express.js, Bootstrap, Scikit-learn
- Tools & APIs: REST APIs, Postman, Firebase, Git, GitHub
- Relevant Coursework: OOP, Machine Learning, Data Structures & Algorithms
- Interested in building scalable web platforms and learning modern UI automation practices for reliable software systems.
